

CSC 317 Introduction to Web Software Development

San Francisco State University

Course Information

Course Number	CSC 317
Course Name	Introduction to Web Software Development
Number of Units	3
Prerequisite	CSC 220 OR Consent from Instructor
Schedule	2 ½ hours a week.

Catalog Description

Introduction to topics in UNIX and creating web pages including reading and processing user input submitted through web pages, client side and server-side programming, connecting a web page to a database, and building an Internet Application.

Course Objectives

Develop a basic understanding of using Linux and Linux's command line tools. Gain experience using git and GitHub. To obtain working knowledge of basic web stack technologies like HTML, CSS, JavaScript, NodeJS, Express. More topics can be covered if time permits.

Required Books

There are no required books for the course. Everything you will need will be provided or directed to.

Recommended Material

[Mozilla Developers Network](#)

[W3 Schools](#)

[CSS-Tricks](#)

[Traversy Media Web Dev](#)

[Jon Duckett – HTML, CSS, JavaScript, jQuery Book Set](#)

[Web Development with Node and Express: Leveraging the JavaScript Stack](#)

Computer and IDE

It is “required” that you have a computer that can run any kind of text editor or IDE. A laptop is recommended. Computers are available for student use in the CS Undergrad Lab. IntelliJ WebStorm is a powerful IDE. There are also Visual Code, Atom, Sublime, Emacs, Vim, nano and other editors that can be used as well. A free licensee for IntelliJ WebStorm can be granted for students for 1 year. When that 1 year is up you can renew this license. Student Licenses can be found here: [Student License](#).

Computer Science Lab

Computers are available for use in the Computer Science Lab (SCI 254). Your lab door passcode is the last 6 digits of your student ID Number (or the lazy code of 9-8-7-6-5-4). Ask a fellow student in the lab how to log onto the system. Contact the CS department (TH 906) if you have trouble.

Class Discord Server

This class will use a Discord server for its out-of-class communication. The server is dedicated to this course only. To join you will need to complete the following steps:

- Click the invite link on iLearn to join the classes' discord server.
 - You will need a Discord account that has a verified email. You DO NOT need to use your school email. If you already have a Discord account this can be used as well
- Once you have joined the server, you will send a direct message (a dm) to the roster-bot. The MUST have the following format:
`!reg csc317 schoolemail`
You are REQUIRED to use your school email. No other email will be accepted. This does NOT mean your discord account has to be created with your school email.
- If you use the above command correctly (and the bot works) you will then be assigned the role of Student.
- Once you have obtained the role of student you may then mark the activity "Join Discord Server" on iLearn as complete. This activity must be marked manually and will not be automatically done once you join the server.

GitHub

This class will use GitHub to manage our class assignments. Students are expected to have made GitHub accounts before starting the first assignment. You are encouraged to brush up on your GitHub skills

Class Website

[iLearn](#) will be our course website.

Midterm Exam

There will be no midterm exams. In lieu of midterm exams, there will be 5 to 10 quizzes given through the semester. Each quiz will be given soon after each topic presented in class is completed. These quiz scores will make up a traditional midterm score (see grading table for exact amount). No quizzes are not dropped and make up quizzes must be requested before the quiz is taken AND with documentation.

Final Exam

There will be no final exam for this course. In lieu of a final exam, each student will complete and present a final project. Failure to complete project results in failure of course.

Teaching Methods

Basic teaching methods: Lectures, Reading (mostly MDN), Assignments, Quizzes, Presentations.

Learning Outcomes

- ❖ Working Knowledge of Linux
- ❖ Working Knowledge of Git
- ❖ Basic Knowledge of HTTP Protocol
- ❖ Working Knowledge HTML
 - Introduction to a template language, Handlebars (if time permits)

- ❖ Working Knowledge CSS
- ❖ Working Knowledge JavaScript
- ❖ Working Knowledge Nodejs
- ❖ Working Knowledge Express
- ❖ Advance Topics as time permits.

Attendance

You are expected to attend all class sessions, and you are responsible for all material covered in class. Material will be covered in class that is not in the textbook. You must make plans with your fellow classmates to get copies of lecture notes and topics covered for the classes you missed. The instructor may not provide lecture notes.

Class Participation

A small portion of your grade is dependent on your participation with the course and communication through Discord. Full disclosure, most of the 5% is solely dependent on your participation in the course Discord Server. Not being present in Discord will result in receiving a 0 for class participation. You are encouraged to ask questions about the assignments, the lectures, the term project, or anything related to the course in Discord. If a student goes above and beyond to when using the Discord server, extra credit can be given. **Students will have a limited amount of time to join the Discord server channel before students will lose all participation points for not joining.**

Assignments

In this class you will implement three to four small-to-medium sized projects. Some of these assignments will be code that you will build upon to help complete your final project. Missing these assignments could affect your final project score or the amount of worked needed to complete your final project.

Final Project

The final project of this course will be a fully functional web application where users will be able to register accounts, log into registered accounts, post images, search images (searching can be done by either registered users or guests. The final project will build on previous completed assignments, therefore their completion by the given dates is important.

Class Policies

Missed Classes

If you skip or miss class, you are responsible for all information covered in class, including updated and additional class notes or project specifications. Please obtain the contact information of fellow students.

Appealing Grades

If you would like to appeal your programming project or test grades, you must do so within two weeks from the date the project or test is returned to you. There will be no exception, even if you miss those classes. You are responsible for obtaining your grade (they will be kept as up to date as possible on iLearn). When submitted a regrade request please use the following steps:

1. Review your grade first!
2. If a mistake is found, please EMAIL the instructor. DO NOT send Discord messages.
3. Use the following subject in the given email: **CSC 317 Section N AssignmentName Regrade request.**
 - a. Where N is the section number
 - b. AssignmentName is the assignment you wished to be checked.
4. In the body of the email please respectfully explain why you think there is a grade mistake. Do your best to be concise on the reason and precise on the location of the mistake.

Failure to follow the above instructions could delay your regrade request or cause it to be missed completely. You have been warned.

Late Assignments

Late project penalty (based on the GitHub commit time stamp): You may submit your project up to 48 hours late. Anything submitted within this time window is only able to earn 75% of the credit. There is a hard cutoff of midnight.

Non-working Assignments

Project Grading: If the grader cannot run your program successfully, the grade you can receive is 50% of the maximum score. Please note that this rule only applies to program/submissions that do not compile or build. Code that is submitted, runs, and then crashes during execution does not trigger this penalty.

Grading

Grade Item	Weight
Assignment 1	5%
Assignment 2	3%
Assignment 3	5%
Assignment 4	7%
Final Project	45%
Quizzes	30%
Participation	5%

Grade Distribution

Range	Letter Grade
95 +	A
90 – 94	A-
85 – 89	B+
80 – 84	B
75 – 79	C+
70 – 74	C
60 – 69	D+
0 – 59	F

Important School Deadlines and Policies

- ❖ Semester drop and withdrawal deadlines and procedures are provided on the University Calendar at [Academic Calendar](#)
- ❖ The University course repeat policy is at [Repeat Policy](#)
- ❖ Student privacy rights can be found at [Student Privacy Rights](#)
- ❖ Please be aware of our IT resources acceptable use policy, posted on our site at [IT Acceptable Use Policy](#)

Academic Cheating

Cheating and plagiarism are very serious offenses and are treated as such. Please see [CS Plagiarism Policy](#) for department policies on cheating and plagiarism. Cheating or plagiarizing can result in a failing grade in the course and/or expulsion from school.

In-Class Texting, Tweeting, Chatting, etc

You may use your computer in class for purposes directly pertaining to the class. Chatting, tweeting, etc., and extraneous work during class are not permitted. Use of mobile devices during class is not permitted. If it is so important, feel free to take it outside. Repeated violations of this policy may result a reduction of your grade

Disability Access

Students with disabilities who need reasonable accommodations are encouraged to contact the instructor. The Disability Programs and Resource Center (DPRC) is available to facilitate the reasonable accommodations process. The DPRC is in the Student Services Building and can be reached by telephone (voice/TTY 415-338-2472) or by email (dprc@sfsu.edu). <https://access.sfsu.edu>

Policy on Observance of Religious Holidays (F00-212)

The faculty of San Francisco State University shall make reasonable accommodations for students to observe religious holidays when such observances require students to be absent from class activities. It is the responsibility of the student to inform the instructor, in writing, about such holidays during the first two weeks of the class each semester. If such holidays occur during the first two weeks of the semester, the student must notify the instructor, in writing, at least three days before the date that he/she will be absent. It is the responsibility of the instructor to make every reasonable effort to honor the student request without penalty, and of the student to make up the work missed.

Student Disclosures of Sexual Violence

SF State fosters a campus free of sexual violence including sexual harassment, domestic violence, dating violence, stalking, and/or any form of sex or gender discrimination. If you disclose a personal experience as an SF State student, the course instructor is required to notify the Dean of Students. To disclose any such violence confidentially, contact:

The SAFE Place - (415) 338-2208; <http://psyserve.sfsu.edu/content/safe-place>

Counseling and Psychological Services Center - (415) 338-2208; <http://psyserve.sfsu.edu/>
